

## Course Evaluation

Lecture = 75%

Three exams (20% each)  
ACS standardized final (20%)  
Several quizzes (20%)

Laboratory = 25%

The three electronics projects will be evaluated by problem sets. The CV, Atomic Spectroscopy, and NMR experiments are evaluated via reports done in the conventional laboratory notebook format. The HPLC experiment will be conducted as a group project. Each group will collectively submit a single formal report.
